

What type of carpet cleaner do you use?

We use the Bissell ProHeat Advanced Carpet Cleaner or RugDoctor. (Sometimes we do use both.)

What carpet cleaning solution do you use to clean the carpet?

We use a special home-made mixture. For privacy reasons, we will not reveal this recipe online. However, while on on-site with the customer, we are more than willing to reveal what is being used on the carpets. Please be advised we DO NOT use any type of bleach or bleaching agents on the flooring.

How long does it usually take the carpet to dry?

Depending on the type of carpet you have, it will take 8 – 24 hours. We do recommend clients wait the full 24 hours for the carpet to be on the safe side. If you have ceiling fans or floors fans, this will speed up the drying time.

What is your cost?

We charge \$25.00 per room. Please be advised if your dining room and living room are connected, it will be treated as SEPARATE rooms.
